Lokke Kyrkje 2016

[Lokke kyrkje bygge-prosjekt fram til fyste veke i februar 2016. Bygge-prosjektet var nesten ferdig. Menigheten hadde invitert alle menigheter i området og hadde konferanse \(stort samling\) heile helga frå 5. – 7. februar 2016. for å les meir trykk her.](#)

Nytt prosjekt : Ny kyrkje på Lokkee

Kyrkja på Lokke vart bygd i 2009

Det er Godt 100 medleamar. Lokke er ein landsby i vekst og ein kyrkjelyd i vekst.

Dei treng Biblar, opplæring, golv, sement til ytterveggar, toalett og benkar

Takk til Bore-speidarane og Bore Kyrkjelyd.

Early studies on the effects of physical activity on blood pressure in children and adolescents have been inconsistent. Some studies have found that physical activity can lead to a decrease in blood pressure, while others have found no significant effect. The results of these studies may be influenced by factors such as the intensity and duration of the physical activity, the age and sex of the participants, and the baseline blood pressure levels. Further research is needed to clarify the relationship between physical activity and blood pressure in this population.
